-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3611

1. Claims 4-14 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim can not depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 4-14 not been further treated on the merits.

2. Claims 1-3 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, the "actuator means" is recited in line 15 and in line 21 as two separate elements of the invention.

The preamble of claim 15 indicates a method is being claimed. However, no method steps are set forth in the claim. Therefore, it is not clear whether a method or apparatus is being claimed, and if a method is claimed, what steps constitute the method.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-3 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kober et al. (USPN 4,664,402) in view of van Peurseem (USPN 3,454,285).

Kober shows a trailer frame including connecting means (non-parallel links 3, 4), between frame 28, 36 and wheel frame 2, 10. The non-parallel links allow the wheel

Art Unit: 3611

frame to move angularly and laterally relative to the frame when the pivots relative to the trailer about coupling 13.

Kober lacks an actuator for controlling the relative turning of the frame.

Van Peurseem shows a trailer with links 34, 36, between frame 21 and wheel frame 10 and an actuator 80 for controlling movement of the frame relative to the wheel frame.

It would have been obvious to one of ordinary skill in the art to provide the Kober trailer with an actuator for controlling movement of the links 3, 4, in order to control tracking of the wheel frame.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hinckley (USPN 4,019,754) shows a trailer with a frame 79 and wheel frame 61-73 interconnected by links 77, 78 that allow pivotal and transverse movement of the frame relative to the wheel frame.

Kober (USPN 4,502,561) shows another trailer with links for moving the wheel frame laterally and angularly.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anne Marie M. Boehler whose telephone number is 571-272-6641. The examiner can normally be reached on 7:30-5:00, Monday-Thursday, and alternate Fridays.
